WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

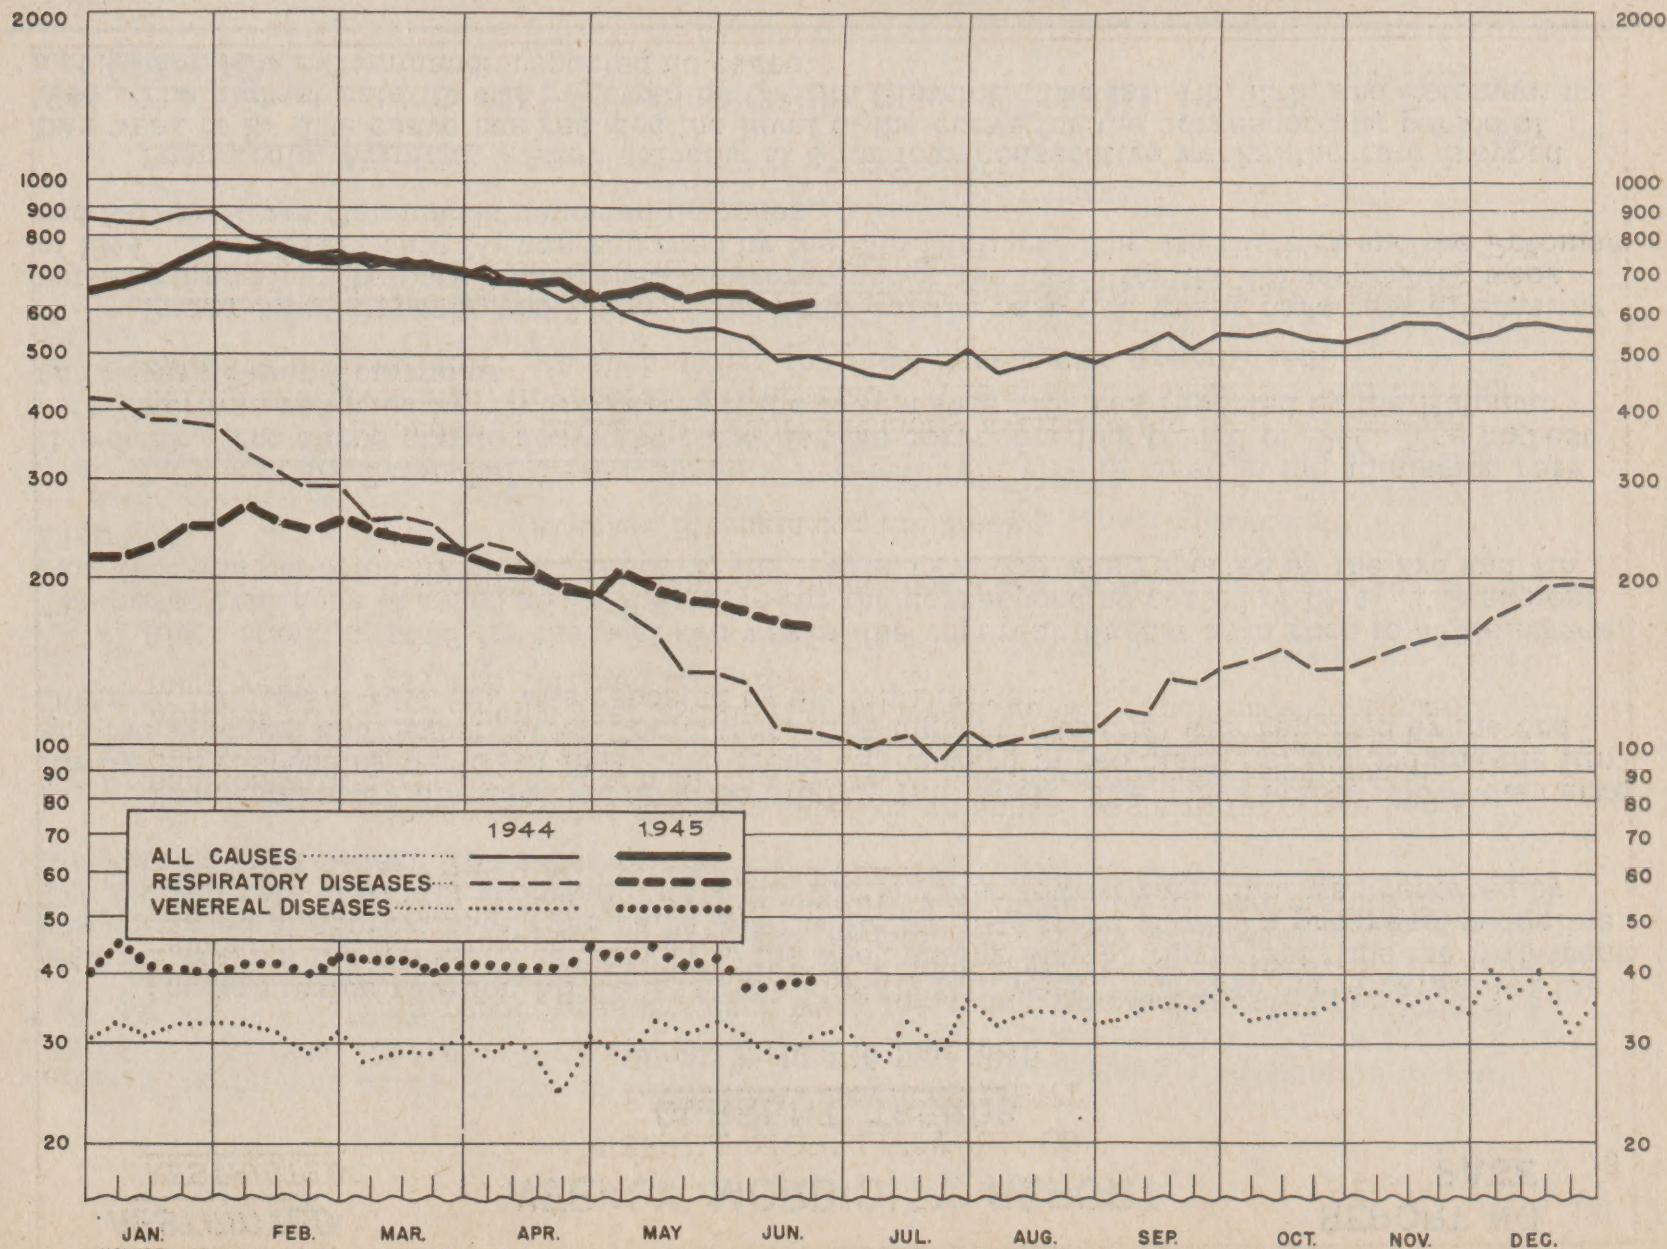

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

FIGURE 1
ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES, VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1944 & 1945

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

RESTRICTED

CURRENT TRENDS

Week Ending 16 June 1945

The admission rate for All Causes rose slightly this week. The 1945 curve paralleled the 1944 curve from the week of February 17 to the week ending May 5. Since that time the 1945 trend has continued at approximately the same level while the 1944 trend showed a progressive decline. The highest rate (791) was reported for the 9th District; the lowest rate (356) was reported by the Potomac and Severn River Commands.

The respiratory disease rate dropped slightly this week. The curve stands above the curve for the corresponding period of 1944. The trend was upward in two districts, the 3rd and the 11th and the Potomac and Severn River Commands. The highest rate (312) was reported by the 3rd District; the lowest rate (55) was reported by the 7th District.

After standing at 38 for the past two weeks, the venereal disease rate rose to 39 this week. The curve continues to stand above the curve for the corresponding period of 1944. The highest rate (70) was reported by the 8th District; the lowest rate (23) was reported by the 3rd and 7th Districts.

Influenza and Catarrhal Fever, Acute. A very slight rise is noted in the admission rate this week. The curve stands above the curve for the corresponding period of 1944. The highest rate (246) was reported by the 3rd District; the lowest rate (36) was reported by the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. The rates for the past five weeks have been alternating between 2 and 3. The rate 2 compares unfavorably with the rate 1 for the corresponding week of 1944. The highest rate (4) was reported by the 13th District. The 4th District and the Potomac and Severn River Commands reported no cases.

Pneumonia, Atypical. After standing at 3 for four consecutive weeks, the rate dropped this week to 2. The curve has reached the level of the curve for the corresponding period of 1944. The highest rate (6) was reported by the 11th District. The 1st, 4th, 12th, and Potomac and Severn River Commands reported no cases.

RESTRICTED

REPORT NO. 181

PAGE 4

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. After rising last week to 58, the rate this week dropped to 55. The curve stands above the curve for the corresponding period of 1944. The highest rate (137) was reported by the 9th District; the lowest rate (15) was reported by the 7th District.

Rheumatic Fever. The trend for this disease stands at 2 for the seventh consecutive week. The curve has reached the level for the corresponding week of 1944. The highest rate (5) was reported by the 9th District. The 4th and 7th Districts reported no cases.

Scarlet Fever. The admission rate for this disease has been reported at 8 for three consecutive weeks. The trend was up in four districts, the 3rd, 5th, 12th, 13th, and in the Potomac and Severn River Commands. The highest rate (31) was reported by the 9th District. The 4th, 6th, and 7th Districts reported no cases.

Cerebrospinal Fever, Meningococcic. The admission rate for cerebrospinal fever, meningococcic after having been reported at zero last week, rose this week to 0.07. Only two districts reported cases, the 9th and 12th.

Malaria. The admission rate for this disease was reported again this week at 2. The rate stands at the level for the corresponding week of 1944. The highest rate (5) was reported by the 7th District. The 6th District reported no cases.

Measles. After a slight rise last week, the admission rate for this week dropped back to 2. This rate compares favorably with the rate 3 for the corresponding period of 1944. The highest rate (3) was reported by the 5th and 9th Districts. The 4th and 6th Districts and the Potomac and Severn River Commands reported no cases.
